

*Integrated switch with  
display of individual  
height settings*

*Lifting force: 1.000 kg;  
Lift: 200 mm*

*Electric motor drive;  
Speed: 10 mm/s*

ergoAGENT base – for a height-adjustable kitchen island. Smooth, fluid height changes are activated via an operating pad which includes a memory function and display of height settings. The island can serve as a central work and storage area or as a cooking zone with an integrated hob. The lifting force of 1000 kilograms allows a free choice of materials and fittings.

Depending on the size of the island (up to 380 x 120 cm), up to three lift modules can be joined by a frame. The mechanical systems are integrated invisibly in the plinth. They take up so little space that the island can be fitted with standard base units from any kitchen range.

## ergoAGENT base

### HEIGHT-ADJUSTABLE KITCHEN ISLAND

 KESSEBÖHMER

**2 lift modules ergoAGENT base**

Dimensions (mm)

800 x 700 x 220

Product code
