

Roller shutters

The finishes

smart plus

Aluminium

- › Straight-lined and striking: extruded slats made of solid aluminium provide the basis for its concise design.
- › Classic and timeless: slat height 25 mm.
- › Absolutely silent: flexible plastic profiles interconnect the single slats free from backlash.
- › High-quality components: end caps made of low-friction polyamide ensure the comfortable operating features of the roller shutter.

Finish

- › Anodised aluminium (E6/C0)
- › Aluminium with stainless steel effect (E2/ES)

Features

- › Various lock options
- › Electrical drive
(further information in our brochure "smart motion")

- 1 Aluminium slat, construction size 25 mm
- 2 Patented connecting profile made of plastic for a silent operation
- 3 Handle profile with integrated end stop damping
- 4 End profile for handle mounting with integrated end stop damping

Suitable for the following guiding modes:

KS 40 - series

ABS plastic with decorative finish

- › Absolutely reliable: the robust interlinkage of the slats stands for longevity even under tough operating conditions.
- › ABS material: recyclable with maximum bending stiffness.
- › Maximum stability: bottom profiles made of real aluminium.
- › Timeless elegance: slat height 40 mm in two surface quality levels.

KS 40 F Slats wrapped with real aluminium

KS 40 L Paintable slats

Finish

- KS 40 F** Anodised aluminium (E6/C0)
Aluminium with stainless steel effect (E2/ES)
